## ORDERING INFORMATION 2023

Greetings to all of our valued customers. We feel grateful to God and to each one of you, for helping make our business a success over the years. We also welcome those of you who haven't tried our products yet. Our goal is to provide you with Quality products and good service.

We try to make ordering as easy as possible for you. One way we do this is by not having extra shipping costs for you to add on for heavy weight or large items, and no complicated UPS charts for you to figure out. Simply check the box on the left side of the order form to see how much you owe for shipping. On items such as seed potatoes we have the extra cost of shipping figured into the price listed. When you compare our price with our competitors please take this into account.

We will try our best to ship your order out as soon as possible, or by the date you request. Please follow the instructions on the order forms and **remember to CLEARLY print your complete address on the order form**. Also include your phone number if possible so we can call if we have any questions about your order.

If you are ordering plants please put down the date you want us to ship your order. Remember to check at the top of the page to see when we start shipping out those plants. **If you are ordering plants that cannot be shipped at the same time as your other items, remember to use separate order forms and add shipping to each order.**

If you want to mail in your order, then pick it up at our store, you are welcome to do so. Just mark your pick up date in the space provided on the order form. Or you can stop in and do the shopping yourself!

We carry lots of items in our store that we don't have listed in our catalog. We are located just 2 miles north of Mt. Hope along State Route 241. So if you happen to be in the area, we'd be glad to see you.

Mention code **DISCOUNT20** to receive \$20 off the Hoss Garden Seeder found on page 44.

Your original order form or invoice, will be returned to you in the packing list envelope on the outside of the box you receive your order in. Upon receiving your order please check it over carefully. If you find any damages or shortages, please let us know immediately by mailing the original order form back to us, along with a note of explanation and we will refund or replace the item. Please do not send any products back without contacting us first.

If there is a certain item or seed variety you would like for us to consider carrying, please send us a note. We would be glad to hear from you. You may also call about **Basic H** products.

We sincerely appreciate your business, and look forward to serving you in the future.

God Bless you,

*The Miller Family*

Our seeds are GMO FREE.

## ONION PLANTS (SWEET ONIONS)

Onion plants are generally used to grow the larger bulbs although they can be used for green onions. Most varieties grow quite large and are usually sweeter than what you grow from sets. The secret to growing huge onions, both from plants or sets is plant shallow and do not hill any soil around the growing bulb. Grow them practically on top of the ground. If you want to harvest green onions, plant deeper. Both sets and plants can be planted from late March-April in Ohio and northern states. Plant in early March further south. Store onion plants in a cool, dry place and loosen bundles. They can be stored in a refrigerator.

### #ONIONPL ONION PLANT PRICES:

## BLUEBERRY FERTILIZERS

Blueberries need acidic soil with an ideal pH level of 4-5. Before planting, the soil should be tested to make sure the pH level is correct. Soil can be acidified by applying a form of Sulfur. Fertilizing, water, and mulching are essential for productive plants. Good mulching materials are aged sawdust, pinebark, or wood chips.

### MINI SOIL PH TESTER

Indicates soil acidity/alkalinity.

#1815 each \$12.30

### \*ACID SPECIAL BLUEBERRY FERTILIZER 17-6-6

Reduce soil pH, which keeps trace elements available to the plant.

#51724 1½ lb. \$16.50

### ALUMINUM SULFATE

Maintains low pH levels and adds nitrogen to soil. Excellent source of acid.

#32175 4 pounds \$9.50

### CHELATED LIQUID IRON

Helps light colored or anemic plants develop darker healthier foliage.

# STRAWBERRY PLANTS

## ALL PLANTS ARE CERTIFIED VIRUS-FREE

*About our Strawberry Plants: We keep the plants in cold storage until the day they are shipped out to you. This keeps them dormant and is less stressful to the plants. When you receive the plants, it is best to get them in the ground as soon as possible, but as we know this is not always possible when the weather does not permit. If you are not able to plant in a day or so, store the plants in a cool dark place. A refrigerator or ice box is ideal. It is a good idea to take the rubber bands off the bundle and loosen the plants.*

*We highly recommend soaking the roots in water for an hour before you plant. It is good to plant early in the spring, but use caution. A long cold and wet spell can be stressful to strawberry plants. If you live in Ohio or about the same distance north, April 10th to May 10th is usually ideal. Points farther south of course can be planted a bit earlier and northern states like Wisconsin should wait till May or at the earliest late April.*

### **EARLIGLOW** EARLY

The best choice for an early strawberry. Great flavor in a medium to large berry. Very productive and disease resistant. Hard to find fault with. Excellent for fresh eating and freezing. Zone 4-8.

### **JEWEL** MID SEASON

Recommended for commercial growers or home gardeners. Berries have outstanding quality for either fresh use or freezing. High yields of very large berries. The fruit is firm and plants are winter hardy. Zone 4-8.

### **CAVENDISH** EARLY MID-SEASON

Produces high yields of attractive, large fruits that ripen over a long growing season. A good choice for commercial or home use, with excellent flavor. Resistant to red stele with some resistance to Verticillium wilt. Zone 3-7.

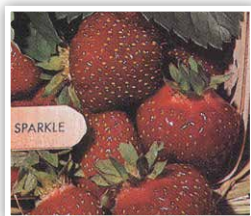

### **CABOT** LATE MID-SEASON

Highly recommended for home gardeners and direct marketing growers. Cabot is known for its huge berries, excellent flavor, winter hardiness and disease resistance. It is by far the best-tasting big berry ever! Best adapted for northern locations and where very large fruit size is required. First fruits may split or be rough. Plants are vigorous but may not run freely indicating closer spacing may be required. Zone 4-7.

### **HONEOYE** EARLY MID-SEASON

Our best seller. Large berry, very productive and winter hardy. Heavily used by commercial growers. Very good for freezing. Produces large firm berries all the way through picking season. Zone 3-8.

### **SPARKLE** LATE

The best berry for jam and freezing. Flavorful, attractive, high quality fruit. Medium sized berries. Very vigorous. Zone 3-8.

### **FLAVORFEST** MID-SEASON

Fruits are large, bright red and exceptionally flavored. Berries are good for freezing. The plants are very vigorous and show excellent resistance to red stele and leaf diseases. Zone 4-7

### **SEASCAPE** EVERBEARING

These plants have the potential to be the most productive of any day-neutral. The berries are large, firm and have a good flavor when picked ripe from the plant. Zone 4-9.

### **BRUNSWICK** EARLY MID-SEASON

Ripens the same time as Honeoye. Good vigor and disease resistance. Excellent flavor with good berry size and appearance. For home gardeners, pick-your-own and farm stand sales. Zone 4-8.

### **ALLSTAR** MID-SEASON

Produces a good crop of large, light colored, sweet berries. Glossy, firm fruit. Highly resistant to red stele with intermediate resistance to verticillium wilt. Zone 4-8.

For best results, do not plant strawberries where you have been growing other garden crops.

## WEED BARRIER

Try our weed barrier fabrics. You will have a practically weed free strawberry bed for several years. We are offering a heavy weight fabric that has been used with good success. The advantage of using a heavier fabric is no mulch is required.

The heavy fabric is ideal for strawberries and also does a great job on raspberry plants. Instructions will be sent with order.

**DUTCH SOIL CONCENTRATE** - 100% Natural. Widely used on strawberry plants in the Fall of the year. A natural concentrate to mix with water and apply to all vegetables, fruits, flowers, grapes, trees and shrubs. Applied to the plant it will stimulate growth and production. Assists in creating natural vigor and resistance to disease, frost and insects.

Can be applied to seeds to assist in quicker germination and emergence. Applied to the soil it helps to make nutrients available to the plants through natural chelating action.

Use 1 Tablespoon to a Gallon of water for strawberry plants. 1 Teaspoon to a gallon for other uses.

## GRASS SEED

Use 3-5 lbs. per 1,000 square feet. 25 Lbs. per acre for horse pasture mix. Step off your area and figure approximately 3 feet per step. Multiply length times width to get square feet. For 1-9 lbs. use the 1# price, for 10-24 lbs. use the 10# price. For over 25 lbs. use the 25# price.

**TIP:** Keep your mower setting on high and the result will be a nicer, healthier lawn. Don't chop it off close to the ground.

### CHAMPION

Champion is our best seller at the garden store. Grows into a lush green carpet that will be the envy of the neighborhood. A top of the line mixture containing 50% named variety bluegrass and 50% named variety fine-textured rye grasses. Champion will produce a quality turf that will do well even under low maintenance conditions.

#CHAMP5	5 pounds	32.50 (6.50/lb.)

## COVER CROPS

Cover crops improve the soil by building soil nutrients and enhancing soil structure.

### GARDEN BUILDER COVER CROP

A blend of all natural seeds including oats, nitro radish and berseem clover. Use to naturally improve soil nutrients and organic matter, provide nitrogen to the crop, control weeds and encourage healthy soil microbes. For fall planting, plant from August to Mid-September. Can also be planted in the spring from February to April then tilled into the soil once the growth is 8"-12" high.

7 pounds seeds up to 7000 sq. ft. Untreated seeds. Coating approved for organic use.

#GBCC 7 pounds 18.50

### WINTER COVER MIX

Contains seed oats and Scav-N-Ger radish. This mix will winter kill, leaving ground clean and ready to plant in the spring. Plant August to September. Covers up to 3,000 sq. ft.

#934W 5 pounds 7.50

### GROUND BREAKER

A mixture of peas and radish. This mix both produces and scavenges nitrogen. Radishes will winter kill.

#GB1	5 pounds	8.50
#GB2	10 pounds	16.50

### SCAVENGER RADISH

Produces a significant root mass. This extra large root system allows nitrogen and other nutrients from deep in the soil to be pulled back to the surface. Helps suppress weeds. Use up to 1/2 pound per 1000 sq. ft.

#SR1	1 pound	4.50
#SR2	5 pounds	15.50

## SPROUTERS AND SPROUTING SEEDS

### SPROUTING JAR LID

## Kwazar QUALITY SPRAYERS

Long lasting sprayers with a finer mist.

Made of tough plastic, these sprayers are built rough enough to last longer for you. The black base is made to protect the tank if you drop it when it's full of liquid. These models all produce a very fine mist, which hangs in the air as a cloud and slowly drops down over your plants, which is ideal for foliar feeding.

### MERCURY

Produces a very fine mist when you pull back the trigger and again when you release it. Use around the home for houseplants, flowerbeds, ect. or as your spray bottle while ironing. Two sizes to choose from.

#MR5 0.5L \$13.50

#MR1 1L \$14.75

### VENUS

Very handy to use! There are many different things these sprayers can be used for around the house, greenhouses, gardens and barns. Because of the fine mist, a solution will go a long way.

#VN1 1L \$33.75

#VN2 2L \$38.50

### BANANA BOOM

Use instead of a regular tip on the Orion and Neptune Sprayers. Has 3 tips letting you spray both sides of your plant and the top all at one time.

#BB each 31.00

### ORION

Made of highly durable and chemically resistant materials. Equipped with viton seals, telescopic lances, carrying straps with a shoulder pad and a volume scale on the side of the tank to check the level of liquid. Use in gardens, produce fields, orchards and greenhouses. Also ideal to use for barbecuing. 5 year warranty on tank.

#OR3 3L \$96.75

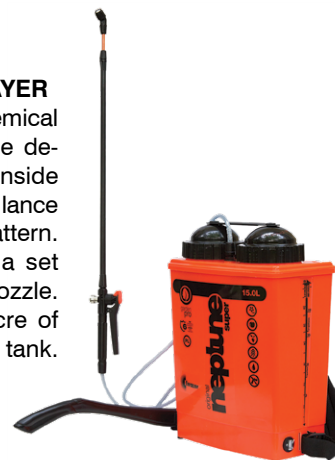

#OR6 6L \$99.00

### NEPTUNE BACKPACK SPRAYER

Made of highly durable and chemical resistant materials. The unique design of the pump unit hidden inside gives a constant pressure in the lance for a very precise spraying pattern. Telescoping lance. Includes a set of spare parts and herbicide nozzle. One tank full feeds over 1 acre of vegetables. 6 year warranty on tank.

#NP15 15L \$175.00

## GARDEN HOES

### V-HOE

These V-shaped hoes are well liked and are locally made. They are strong and work well for making furrows, and also for closeup hoeing.

#218 \$39.50

### NEBO HOE

Improved head design and angle lets you work in and around plant rows easily. Head is forged out of carbon steel and drawn into a thin taper which results in a tough sharp edge that will penetrate soil with ease. Blade is set at an angle for easy undercutting using minimum effort.

## HOSS® GARDEN SEEDER

**HOSS® GARDEN SEEDER**

The Hoss Garden Seeder makes planting easy with our innovative seed plate design that allows you to customize planting to meet your exact needs. With Amish-crafted, hardwood handles, 15" steel wheels

and a powder-coated steel frame, this is the most durable Garden Seeder you will find. Seed Plates lie flat in the hopper, ensuring accurate planting without wasting seed by overplanting. The adjustable rolling coulter furrow opener allows you to plant in any soil type and in areas with large amounts of organic debris. The drag chain behind the seed drop tube covers the planted seed and the rear wheel compacts the ground behind the covered seed. Works great in freshly tilled soils. **This price includes shipping.**

**Please note:**  
Availability on Fall Bulbs may vary. If a variety is ordered that is unavailable, we will substitute with a similar variety if we can.

**Use order form immediately following page 82 for all fruit trees and grape plants on pages 80-81.**

Grow your own small orchard and enjoy eating fresh fruit from your fruit trees. Homegrown fruit is also great for canning, cooking, and making pies and sauce. To get started, you can even plant several trees in your yard.

Excellent quality, hardy, bare root fruit trees, 4'-5' tall. Guaranteed to grow. If trees do not grow, please contact us by July 15. They should produce within two to three years after planting. Complete instructions for planting and primary care are included with every order. Trees will be shipped out, or can be picked up at our store.
